

Basic Details of the Team and Problem Statement

Ministry/Organization Name/Student Innovation:
GOVERNMENT OF JHARKHAND

PS Code: **SIH1369**

Problem Statement Title: **Online Integrated Platform For Project Taken up by the Students of Various Universities/Colleges.**

Team Name: **818_Busted Minds**

Team Leader Name: **Mihir Chouhan soja bhai**

Institute Code (AISHE): **C-36075**

Institute Name: **Indore Institute Of Science and Technology**

Theme Name: **Smart Education**

Idea/Approach Details

The "**Project Approval System**" is a comprehensive **web application** designed to streamline and **modernize the project approval process** for universities and colleges. This innovative platform simplifies project submission, evaluation, and allocation, ensuring a seamless experience for both **students** and **faculty members**.

- **User-Specific Login** : Separate login portals for students and faculty members, each offering **unique functionalities**.
- **Effortless Project Submission** : Students or project team leaders can easily **upload their project documents in various standard file formats**, including PDF, Word, and more.
- **Document Management** : Students can upload related documents and source code to provide a comprehensive **overview of their projects**.
- **Faculty Evaluation** : Faculty members have the **authority to accept, reject, or offer feedback** and suggestions on submitted projects. Their responses are visible to the students.
- **Plagiarism Detection** : **AI-powered plagiarism detection** ensures the authenticity of project submissions by identifying duplicate content.
- **Guide Allocation** : The system employs **AI to automatically** match projects with appropriate faculty guides **based on expertise and tech stack**, ensuring students receive guidance tailored to their needs.
- **Guided Collaboration** : Faculty guides can view and manage all the groups under their supervision, while students can access feedback and responses only for their projects.
- The "**Project Approval System**" not only enhances the **efficiency of project approval** but also promotes fair evaluation and **tailored guidance for students**, ultimately enriching the academic experience.

Technology stack :

- Html
 - CSS
 - JavaScript
 - React
 - NodeJs
 - Java
 - Tailwind CSS
 - BootStrap
 - MongoDB
 - SQL
 - SocketIO
 - Python
 - Machine Learning
 - AI
-
- The technology stack is visually represented by a collection of logos including: Java, CSS, React, Node.js, JavaScript (JS), MongoDB, MySQL, AI (Artificial Intelligence), and a lightning bolt icon.

Idea/Approach Details

Describe your Use Cases here

1. **Student Entity:**
 - **Login()** : Allows students to log in to the web app.
 - **UploadProject()** : Enables students to upload their project, including documents and source code.
 - **ViewOwnFeedback()** : Allows students to view feedback specifically related to their project.
2. **Faculty Entity :**
 - **Login()** : Provides faculty members with the ability to log in to the web app.
 - **ReviewProject()** : Faculty can review student projects for approval.
 - **ProvideFeedback()** : Faculty members can provide feedback or suggestions on student projects. Their feedback is visible to students.
3. **AI Entity :**
 - **CheckPlagiarism()** : The AI checks for plagiarism among all submitted projects to detect any similarity in documents or source code.
 - **AllocateGuide()** : Automatically allocates project guides based on student expertise and tech stack.
4. **Guide Entity :**
 - **ViewAssignedGroups()** : Guides can see the groups of students assigned to them.
 - **ProvideFeedback()** : Guides can provide feedback to the student groups they are responsible for.
5. **Project Entity :**
 - **Upload()** : Represents the functionality for students to upload their projects.
 - **ViewFeedback()** : Allows students to view feedback related to their projects. This feedback may come from both faculty and guides.

Describe your Dependencies / Show stopper here

1. **Authentication and Authorization** : Secure user access and define roles.
2. **File Upload and Storage** : Manage uploaded project files efficiently.
3. **AI Integration** : Implement plagiarism detection and guide allocation.
4. **Database** : Choose the right database technology and schema.
5. **Tech Stack** : Select appropriate languages and frameworks.
6. **Web Hosting and Scalability** : Ensure reliable hosting and scalability.
7. **UI/UX Design** : Create an intuitive user interface.
8. **Security** : Address security vulnerabilities.
9. **AI Accuracy** : Ensure AI algorithms provide accurate results.
10. **Scalability Issues** : Prepare for high user loads.
11. **Data Privacy** : Comply with data privacy regulations.
12. **User Training**: Provide user guides and training.
13. **Feedback Mechanism**: Facilitate effective faculty-student communication.
14. **Legal and Compliance**: Ensure compliance with standards.
15. **Technical Support**: Offer user support for technical issues.

Team Member Details

Team Leader Name: Mihir Chouhan

Branch : Btech Stream : CSE Year : IV

Team Member 1 Name: Naman Jain

Branch : Btech Stream : CSE Year : IV

Team Member 2 Name: Kuldeep Singh Rathore

Branch : Btech Stream : CSE Year : IV

Team Member 3 Name: Pradyum Tahekar

Branch : Btech Stream : CSE Year : IV

Team Member 4 Name: Lakshya Gupta

Branch : Btech Stream : CSE Year : IV

Team Member 5 Name: Manisha Shivhare

Branch : Btech Stream : CSE Year : IV
